PROJECTS

Hotel Management System | Live Demo: hotelmanagementsystem3.onrender.com

Tech Stack: Java, Spring Boot, Spring Security, Hibernate/JPA, PostgreSQL, RESTful APIs, Docker, Render, Postman

- Developed a full-stack hotel management web application supporting room booking, check-in/check-out, and billing through RESTful APIs.
- Secured RESTful APIs with Spring Security (authentication and authorization) and implemented CRUD operations using a layered (MVC) architecture.
- Containerized the application with Docker, deployed it on Render with a live PostgreSQL database, and tested CRUD endpoints using Postman.

Sealsend – P2P File Transfer Application

Tech Stack: Java, Socket Programming, Spring Boot, RESTful APIs, Web Front End

- Built a peer-to-peer file transfer application using Java Socket Programming for direct sender-to-receiver file sharing, with no third-party or server access to file data.
- Developed Spring Boot RESTful APIs for peer discovery and session management, with a web front end to initiate and track file transfers.

E-Commerce Website (Front End)

Tech Stack: HTML5, CSS3, JavaScript

- Developed a responsive e-commerce front end using HTML5, CSS3, and JavaScript with product listing, shopping cart UI, and client-side form validation.
